Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to the remote control, classified in class 434, subclass 307R.
 - II. Claims 9-11, drawn to the insert, classified in class 341, subclass 173.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are prima facie independent and distinct inventions due to their recitations of distinct and specific structures. Invention I is directed to the structural elements of the remote control. Invention II is directed to the structural elements of the insert of the printed publication. Because these inventions are distinct for the reasons given above and has acquired a separate status in the art because of their recognized divergent subject matter as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
